

User Manual

- Storage temperature:-40~+80℃
- Operating temperature:-25~+60℃
- Installation surface must be smooth clean and dry.
- When installing the light strip, please be careful to remove strip can be cut following the cutting lines
- keep away from child avoid suffocation

Package List

1. 2×1m LED Light Strips
2. 2×Battery Boxes (batteries not included)

1. Standard Battery Usage Specifications (Important)

The dim light problem is **not caused by product quality defects**, but mainly by incorrect battery usage. Please strictly follow the rules below:

- **FORBIDDEN:** Do not mix new and old batteries for use.
- **FORBIDDEN:** Do not use low-power or exhausted batteries.
- Use 3 brand-new AA batteries with consistent power for power supply to ensure stable and high-brightness lighting effect.
- Replace batteries in time when the light dims to avoid abnormal use.
- Remove the batteries if the light strip is not in use for a long time to avoid battery leakage and damage to the battery compartment.
-

2. Product Use Safety Notes

- This is a low-voltage light strip with safe voltage, harmless to human body.
- The light strip **must only be used with the matching battery box**. Do not connect to a voltage higher than 4.5V, otherwise the product will be permanently damaged.
- Do not keep the light strip coiled on the reel for a long time during operation to ensure normal heat dissipation.
- Children under 16 years old must use this product under adult supervision.
-

3. Troubleshooting Guide Problem: Light strip does not light up / dim lighting

- Check whether the battery box switch is turned on.
- Confirm all batteries are brand-new with full power, no mixing of new and old batteries.
- Check if the batteries are installed in correct positive and negative directions.
- Check whether the light strip interface is in good contact.
-

4. Problem: Adhesive cannot stick firmly

- Confirm the pasting surface is dry and clean without dust.
- Avoid repeated tearing and pasting operations.
- Wait 2–24 hours after pasting for the adhesive to reach optimal viscosity.
-

5. Problem: Wire breakage

Wire breakage is caused by violent pulling or improper manual operation, not product quality problem. Please install and use gently in accordance with standard steps.

6. Wide Application

This flexible cuttable LED light strip is perfect for decoration and ambient lighting of computer, keyboard, TV, cabinet, corner, camping, home interior, party, hotel, club and shopping mall, suitable for most indoor and outdoor scene decoration.

7. After-sales Service

All products are fully tested before delivery. We provide professional customer service, and all emails will be replied within 24 hours. We are committed to providing satisfactory shopping experience for every customer.

8. Installation Instructions & Adhesive Usage Guidelines

The light strip is equipped with blue film delayed curing high-viscosity acrylic adhesive with delayed adhesion enhancement characteristics. The adhesion will continue to increase over time after pasting for firmer and longer-lasting fixation

Standard Pasting Requirements (Must Follow):

1. Please paste the light strip on adry, clean, dust-free and flat surface.
2. Do not tear off and re-paste after installation, which will cause permanent loss of adhesive viscosity.
3. Avoid pasting on wet, rough, dusty or uneven walls to prevent poor adhesion.

Installation Note: The light strip features high-toughness glue-dropped waterproof wire material. Do not pull, bend or twist the strip violently during installation to avoid artificial damage. Normal standardized installation will not cause wire breakage.
